Description	Presence of proper placeholders always helps users get a quick idea of what to be filled within the text field. Lack of appropriate placeholders can sometimes lead to entering up of wrong or invalid data by users.

Steps to Reproduce
1. Open the website https://app.vwo.com/#/login
2. Check for proper placeholder for email address and password field

Actual Result: Placeholders not present
Expected Result: Placeholders should be present
URL: https://app.vwo.com/#/login

[BUG-2] All the fields in login page not marked mandatory

Created: 12/March/24 Updated: 12/March/24

Description Both the email address and password field is mandatory in login page but both the fields haven't been marked with asterisk (*) to indicate mandatory field

Steps to Reproduce
    1. Open the website https://app.vwo.com/#/login
    2. Check for * symbol near both the text fields to indicate they are mandatory
Actual Result: Both fields are not marked as mandatory
Expected Result: Asteriks (*) symbol displayed near both email address and password field
URL: https://app.vwo.com/#/login

[BUG-3] No toggle option to set the visibility of the password

Created: 12/March/24 Updated: 12/March/24

Status:	To Do

Description	It is necessary to have a toggle option to hide/unhide the password so that users can confirm whether the password they entered is correct or not.

Steps to Reproduce
      1. Open the website https://app.vwo.com/#/login
      2. Check for option to toggle is there for password field
Actual Result: No toggle option to hide/unhide password
Expected Result: Password can be toggled to hide/unhide visibility
URL: https://app.vwo.com/#/login

[BUG-4] Absence of Login success popup message after successful login.

Created: 12/March/24 Updated: 12/March/24

Status:	To Do

Description	After successful login, there should be a confirmation message prior to display of the next page letting the user know that login was successful before they are taken to the next page. However lack of any proper confirmation message can confuse the user as to whether login was successful or not.

Steps to Reproduce
1. Open the website https://app.vwo.com/#/login
2. Enter email address
3. Enter password
4. Click on SignIn button
5. Check for popup notification displayed if login is successful

Actual Result: No success popup displayed

Expected Result: Login success popup message displayed

URL: https://app.vwo.com/#/login

[BUG-5] User account not locked after a number of unsuccessful login attempts

Created: 12/March/24 Updated: 12/March/24

Status:	To Do
Project:	VWO
Components:	None

Description	To ensure security to the login page, we need to make sure that the account gets locked after a number of unsuccessful login attempts to prevent the account from being hacked or misused by someone else.

Steps to Reproduce
1. Open the website https://app.vwo.com/#/login
2. Enter valid email address
3. Enter valid password
4. Click on Sign In button

Actual Result: Account doesn't get locked and the user can try to login as many times as they want
Expected Result: Account gets locked
URL: https://app.vwo.com/#/login

[BUG-6] Password field value cannot be copy pasted from elsewhere

Created: 12/March/24 Updated: 12/March/24

Status:	To Do

Description	Password field should be secured and shouldn't allow users to directly copy the value from somewhere and paste it. The users should type and enter the password for security purposes.

Steps to Reproduce
      1. Open the website https://app.vwo.com/#/login
      2. Enter valid email address
      3. Copy password and paste it into password field
Actual Result: Password values can be copy pasted
Expected Result: Password values cannot be copy paste into password field
URL: https://app.vwo.com/#/login
